FOR IMMEDIATE RELEASE

Minuteman[®] EnSpire[™] Standby Uninterruptible Power Supply Sets a New Standard for Flexibility, Capacity and Value

Carrollton, Texas – March 27, 2007

Para Systems, Inc., a leader in power technology with its line of Minuteman[®] Uninterruptible Power Supply (UPS) systems, announces its Minuteman[®] EnSpire[™] Standby UPS Series. This exciting new UPS line provides users features needed to protect valuable equipment with a low-cost product.

Two models are being introduced:

- EnSpire EN400 rated at 400VA/300Watts
- EnSpire EN600 rated at 600VA/300Watts

Back up time for both units is two minutes at full load and ten minutes at half load allowing time to systematically turn off connected equipment without losing critical data.

Each unit has six outlets; three provide battery support along with spike and surge protection and three provide spike and surge protection only. In addition, two of the outlets are specifically spaced to support transformer blocks.

The EnSpire units are uniquely designed with outlets on the top and are small enough to be placed on or under a desk or table and both models can be wall mounted.

For over 25 years, Para Systems, Inc. has provided quality power products with excellent personalized service and direct human response to all service and support calls. EnSpire products pass extensive quality control testing before being shipped to customers.

Features of the EnSpire Standby UPS include:

- **USB Communications** – EnSpire UPS USB connections are automatically recognized by Microsoft® Windows® software. No special USB drivers are required. The EnSpire Series automatically recognizes USB connections with its HID (Human Interface Device) compliant USB communications.
- **Minuteman SentryPlus™ Software** – SentryPlus auto-shutdown and monitoring software is included with every unit. No special downloads or coupons are required.
- **Telephone/Fax/Modem Line Protection** - The EnSpire UPS provides a low cost means of protecting telephone/fax/modem lines.
- **RoHS Compliant** – Recognizing the need to promote environmental responsibility, EnSpire products are manufactured in accordance with RoHS guidelines.
- **Larger Load Capacities** – The 400VA and 600VA capacities of these units has been increased over previous models allowing them to support larger power requirements.
- **Minuteman Support** - Para Systems includes full end-user support that includes toll-free technical service from our headquarters in Carrollton, Texas.
- **Warranty** - The UPS is covered by three-year parts and labor warranty and a \$50,000 Minuteman Platinum Protection Plan® for connected equipment (U.S.A. and Canada only). The battery is covered by a two-year warranty.

Lower costs and more features makes the Minuteman® EnSpire Series UPS the value leader in the UPS industry, with MSRPs between \$59.00 and \$75.00. The Minuteman® EnSpire Series UPS is in stock and ready for immediate delivery.

[Photos of the new EnSpire UPS Series products are available at our website: www.minutemanups.com/media or contact Bob Martin at 972.446.7363 ext. 240 or bmartin@minutemanups.com]

Background.

Para Systems, Inc. is a leading provider of power technologies including the Minuteman® Uninterruptible Power Supplies (UPS) for mission-critical equipment protection such as computers, telecommunications systems, security systems and internet devices. Minuteman® UPS products range from 325VA standby units to true sine wave, line interactive, and on-line models rated up to 10kVA.

Para Systems provides SentryPlus™ remote power and network management controller software for all popular operating systems including Microsoft® Windows®, Novell, Unix, and Linux. Para Systems also sells power distribution units (PDU), power management software, keyboard-video-mouse (KVM) systems and surge suppressors.

Additional corporate and product information is available at the Company's website www.minutemanups.com. A free UPS sizing and selection tool is available at www.sizemyups.com that can determine which Minuteman® UPS units can best meet your application's power protection needs and www.comparemyups.com can compare features to competitive products.

Minuteman® UPS and Minuteman Platinum Protection Plan are registered trademarks and EnSpire and SentryPlus are trademarks of Para Systems, Inc. Other trademarks are registered by their respective companies.
