FOR IMMEDIATE RELEASE

## Comprehensive Line of Surge Suppressors

### Released as New Line of Products

---

**New features including rotating outlets, "child safety" covers,  
communications protection and ruggedized units**

**Carrollton, Texas – May 30, 2007**

Para Systems, Inc., a leader in power technology with its line of Minuteman<sup>®</sup> Uninterruptible Power Supply (UPS) systems, announces a new line of surge suppressors.

A total of ten new products have been released and are available for immediate delivery.

The Minuteman surge suppressors can be categorized into the following four classifications.

- **Rotating outlets** – Four of the new Minuteman surge suppressors have rotating outlets that are designed to alleviate the issue of plugging a

number of multiple transformer “blocks” into a power strip without covering other outlets.

- 6-Rotating outlet surge suppressor with coax and phone line protection. [MMS760RCT]
- 8-Outlet/6-rotating and 2 fixed outlets surge suppressor [MMS780R]
- 10-Outlet/5-rotating and 5 fixed outlets surge suppressor with phone line protection [MMS7100RT]
- 12-Outlet/8-rotating outlet surge suppressor with coax and phone line protection [MMS7120RCT]
- **“Child safety” surge suppressors** – Designed to avoid shock from accidental contact with electrical power. Two of the new products feature outlets that require the sliding of a safety cover before a plug can be inserted into the surge suppressor. This reduces the possibility of a person inserting an object into an outlet. These surge suppressors are ideal for schools, child care facilities and homes with small children. One of the units (model MMS370T) also has a connection to provide protection for a phone line. The units are:
  - 7-Outlet surge suppressor with “child safety” covers [MMS370]
  - 7-Outlet surge suppressor with “child safety” covers and phone line protection [MMS370T]
- **Ruggedized surge suppressors** - Designed to operate in harsh environments.
  - Ruggedized 7-outlet surge suppressor [MMS570]
- **Other**
  - Single outlet wall tap surge suppressor [MMS110]
  - 3-Outlet wall tap surge suppressor with coax protection [MMS130C]
  - 6-Outlet surge suppressor “twin pack” [MMS362P]

**Additional major features of the new surge suppressors include:**

- **Wall mountable** – all of the new surge suppressors are wall mountable, thus saving desk and floor space.
- **Telephone/Fax/Modem Line Protection** – Several of the new surge suppressors provide protection for coax, phone lines, fax lines and modem lines.
- **RoHS Compliant** – Recognizing the need to promote environmental responsibility, Minuteman surge suppression products are manufactured in accordance with RoHS guidelines.
- **Minuteman Support** - Para Systems includes full end-user support that includes toll-free technical service from our headquarters in Carrollton, Texas.

- **Warranty** – Each of the Minuteman surge suppressors are covered with a warranty and connected equipment protection.

For over 25 years, Para Systems, Inc. has provided quality power products with excellent personalized service and direct human response to all service and support calls. Minuteman products pass extensive quality control testing before being shipped to customers.

Low costs and unique features make the Minuteman® surge suppressors a value leader in the UPS industry, with end-user pricing between \$7.00 and \$60.00. The Minuteman® surge suppressors are in stock and ready for immediate delivery.

## Background.

Para Systems, Inc. is a leading provider of power technologies including the Minuteman® Uninterruptible Power Supplies (UPS) for mission-critical equipment protection such as computers, telecommunications systems, security systems and Internet devices. Minuteman® UPS products range from 400VA standby units to true sine wave, line interactive, and on-line models rated up to 10kVA.

Para Systems provides SentryPlus™ remote power and network management controller software for all popular operating systems including Microsoft® Windows®, Novell, Unix, and Linux. Para Systems also sells power distribution units (PDU), power management software, keyboard-video-mouse (KVM) systems and surge suppressors.

Additional corporate and product information is available at the Company's website [www.minutemanups.com](http://www.minutemanups.com). A free UPS sizing and selection tool is available at [www.sizemyups.com](http://www.sizemyups.com) that can determine which Minuteman® UPS units can best meet your application's power protection needs. The website [www.sizemypdu.com](http://www.sizemypdu.com) can determine which PDU is the appropriate product and [www.comparemyups.com](http://www.comparemyups.com) can compare UPS features to competitive products.

**Minuteman® UPS and Minuteman Platinum Protection Plan are registered trademarks and EnSpire and SentryPlus are trademarks of Para Systems, Inc. Other trademarks are registered by their respective companies.**
