

FOR IMMEDIATE RELEASE

Minuteman Launches Two New On-line Battery Backup Systems

New product lines offer power protection for mission critical equipment

Dallas, TX – November 8, 2017 – Para Systems, Inc. today announced new additions to its line of Minuteman Uninterruptible Power Supplies (UPS). These battery backup systems utilize double conversion technology and provide power management features for protecting large networks, servers, data storage, enterprise communications, large-scale security systems, industrial equipment, and Distributed Antenna Systems (DAS). The two product lines introduced are the Encompass Series and Endeavor LCD Series.

By using double conversion, true on-line architecture, both product lines create an “electrical firewall,” providing the ultimate protection for critical applications. Utilizing an AC-DC-AC conversion process for incoming utility power at all times, these units ensure a pure electrical signal is supplied to the attached equipment.

The new Minuteman Endeavor LCD Series offers an industry-first 5-year warranty and a high efficiency power factor of 0.9, with capacities ranging from 1000VA to 3000VA. Users can stay on top of all aspects of power conditions whether they are near the unit or at an off-site location thanks to an on-board LCD status display and control panel, coupled with the ability to monitor power conditions remotely via Minuteman’s SentryHD software. Additionally, an option slot is included to accommodate Minuteman’s SNMP communication card and environmental monitoring probes, or an optional programmable relay card. Multiple external battery packs can also be added to provide extended back-up time solutions that many critical systems require.

“The Endeavor LCD Series from Minuteman provides premium power protection with a ground-breaking 5-year warranty that is unmatched in the industry,” said Bill Allen, Director of Marketing. “Minuteman has raised the bar in on-line UPSs when you combine the industry’s best warranty with outstanding features.”

The Encompass Series is the other new product line being introduced to the market. Capacities range from 1000VA to 3000VA, and these models feature a three-year warranty, including batteries. Like the Endeavor LCD products, these true on-line UPS’s provide high efficiency with a 0.9 power factor, an LCD status display, plus a variety of other useful features. The Encompass Series is also compatible with Minuteman’s SentryHD power management software and allows the addition of an optional SNMP network card, environmental monitoring, and a programmable relay card.

“The Encompass Series is positioned as a full-featured, yet value-priced product in the on-line UPS market,” stated Bill Allen. “For users that do not need external battery packs and are seeking a true on-line UPS, the Encompass models are an excellent choice.”

Both new product lines feature ENERGY STAR certification and have an Eco Mode which further increases efficiency and reduces power consumption. All models can be used in a tower or rack-mounted configuration.

The Endeavor LCD and Encompass Series are now available for purchase from Minuteman’s extensive line-up of distributors and resellers. For more information on these new product offerings, visit www.minutemanups.com/endeavorLCD or www.minutemanups.com/encompass.

About Para Systems, Inc.

Para Systems, Inc., based in Carrollton, TX, is a leading provider of power protection products. The company's Minuteman brand of comprehensive power protection solutions include small to large-scale uninterruptible power supply (UPS) products, along with a full line of surge protectors, power distribution units, and remote power management systems. Minuteman products protect telephone/VOIP systems, computers, network servers and peripherals, security systems, distributed antenna systems (DAS), and industrial applications. The Minuteman brand of products is sold through a network of distributors and resellers throughout the United States, Canada, Central, and South America. Para Systems is a wholly-owned subsidiary of Components Corporation of America, headquartered in Dallas, TX, whose roots date back to 1916. For more information, visit www.minutemanups.com.
